^{*}Above colors are for reference only, figures are laboratory test results, actual production may vary from batch to batch

HIGHLIGHTS

IR Nano ceramics series for all automotive/commercial/residential; non-reflective ceramics apply on the films. IR ceramics film is a non-metalized coating film. It is known for best Infrared rejection. High in transmission for visible light, and low outer light reflection; the series could be use both for cars and buildings.

FEATURES

- 1) Best in IR blocking and heat reduced.
- 2 Not blocking GPS nor mobile network
- ③Protect indoor furnishing
- **4** Lower overall energy cost
- ⑤Nano ceramics film without metal

^{*} Depending on different test instruments, the above IR Reject figures might have $\pm 2\%$ deviation.
